

Please keep technology growing. Trying to shut down Satellite Radio rights to broadcast programs that benefit the consumer, Because members of the NAB are worried about losing money is taking a step back. Maybe If they would be more creative with their programming and quit filling up the air time with commercials or obnoxious DJ's a person would like to listen to them. Also the diversity of the Music, News, sports and other Generes Is Great for The consumer in Limited Markets. Just Try It and You'll see. Remember Compitetion is great for the consumer and progress.
